DETAILED ACTION

Allowable Subject Matter

1. Claims 1-21 are allowed.

The following is an examiner's statement of reasons for allowance:

- 2. The present invention teaches a digital signature service integrated into a database. Each independent claim identifies the distinct feature of receiving a store procedure with data and in response performing signature generation upon the data. The closest prior art, Bisbee US Patent No. 6,237,096 teaches a system for electronic transmission, storage, and retrieval of documents. The cited prior art fails to teach a store procedure being received and in response performing subsequent digital signature generation using a client private key and client digital certificate. Instead, Bisbee discloses steps of signing a document and subsequently storing a document by way of an authentication center. Bisbee's steps do not include the claimed limitations of receiving a store procedure that triggers subsequent processing digital signing procedures (see Appeal Brief filed 6 August 2004, Page 4) and thus fails to anticipate or render the above limitations obvious.
- 3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
